

Scientifically Advanced Diagnostics

Individualized Care

Sibcy House is a unique mental health treatment environment. Our diverse clinical team uses state-of-the-science technology to accurately diagnose patients and create individualized treatment plans, resulting in better long-term outcomes. Sibcy House is a destination of choice for adults age 18 and over seeking the most advanced short-term residential care without the restrictions imposed by third-party payers.

THE IMPORTANCE OF AN EARLY DIAGNOSIS

An early and accurate diagnosis greatly enhances each patient's recovery process. Sibcy House offers an in-depth diagnostic assessment as part of every program to support treatment plans that can offer the best chance for a successful therapeutic outcome.

Advantages of an early diagnosis:

- Recovery is more likely to progress in a positive direction throughout treatment
- Avoids multiple treatment attempts at numerous facilities
- Cost of care can be better managed
- Treatment leads to better long-term outcomes
- Reduce short and long term negative impact on immediate family and support systems

A SERENE AND PRIVATE WOODED SETTING

Sibcy House at Lindner Center of HOPE's exterior resembles a beautiful lodge surrounded by woods and walking paths. Though the setting is peaceful and secluded, it is easily accessible from Interstates 75 and 71, located 22 miles northeast of Cincinnati in Ohio.

All 16 patient rooms are private, with full baths and quality linens and furnishings. Other amenities include:

- A restaurant-quality dining room with vaulted ceilings and center fireplace
- Libraries and other quiet activity spaces
- A spacious fitness center and gymnasium
- Faith Center
- Walking paths and gardens

Serving patients age 18 and older with :

- Depression & Bipolar Disorders
- Eating Disorders
- Addictive & Co-occurring Psychiatric Disorders
- Anxiety & Obsessive Compulsive Disorders
- Schizophrenia & Related Conditions

SIBCY HOUSE PROGRAMS

Comprehensive Diagnostic Assessment (\$17,550.00)

Sibcy House's Comprehensive Diagnostic Assessment provides patients, families and continuing care providers with the information needed to begin and continue treatment with the best chance of an optimal clinical outcome. At the conclusion of the Comprehensive Diagnostic Assessment, many patients decide to remain at Sibcy House to begin their treatment plan and most patients complete the 28-Day Program. This in-depth diagnostic assessment, typically completed in 10 days or less, includes:

- Psychiatric and psychopharmacologic evaluation
- Individual psychotherapy
- MRI (when clinically indicated)
- Pharmacy and laboratory services
- Summary of diagnostic results and treatment plan available to patients and referring professionals
- Evaluations for substance use and addictive disorders, stress management, impulse control disorders, trauma and post-traumatic stress, electro-convulsive therapy and forensic evaluation
- Psychological and neuropsychological testing
- Neurologic evaluation
- EEG
- Nutrition evaluation

28-Day Diagnostic and Treatment Program (\$40,160.00)

Sibcy House's 28-Day Diagnostic and Treatment Program includes the Comprehensive Diagnostic Assessment followed by daily treatment to implement the patient's individualized plan.

Continuing Treatment (\$11,235.00)

At the conclusion of their initial stay, patients often choose to remain at Sibcy House for continuing treatment for intervals of seven days to continue following their treatment plan.
